The Bryan Museum Oculus Go Virtual Reality Loaner Program Care and Usage Guidelines

The Oculus Go devices are made available exclusively for viewing The Bryan Museum's virtual reality film products loaded on the devices. To minimize classroom distractions and prevent access to undesired content, we highly recommend that you **do NOT connect them to your school's Wi-Fi network** and use them only in the Developer Mode. If you are not familiar with operating an Oculus Go, we recommend that you turn on the Oculus Go and watch the brief tutorial by navigating to the Library using the menu at the bottom of the screen, then clicking on Relaunch Tutorial from the menu on the far left side of the screen.

Wi-Fi Settings

To ensure that the Wi-Fi is turned off, click on Settings in the menu at the bottom of the screen (if you do not see the menu, press the Oculus button on the controller), then click on Wi-Fi, make sure the toggle and text at the top of the screen that appears says OFF.

Developer Mode

To ensure the Oculus Go is in Developer Mode, go to either the Home or Library screen and look to the lower right of the screen for a small circle with a gear icon inside, click the circle/gear icon and from the screen that appears select View Developer Feed, and then click OK.

View the Bryan Museum Content

Virtual reality access to The Bryan Museum is offered in two ways, as a Guided Tour featuring students and a brief introduction by Mr. J.P. Bryan and as a Self-Guided Tour with much greater visual access to the artifacts featured in the film.

Guided Tour

To launch the Guided Tour, go to the Library on the menu at the bottom of the screen, and select the Wonda App from the screen. This will launch the app, then simply focus on which blue circular icon/chapter you want to watch and the device will select it for you. To close the app, simply click the Oculus button on the controller TWICE.

Self-Guided Tour

To launch the Self-Guided Tour, go to the Library on the menu at the bottom of the screen, and select Unknown Sources from the menu on the left side of the screen, then select Bryan Museum from the list that appears in the center of the screen. This will launch the app, then simply focus on which blue or orange circular icons and the device will select it for you. Blue icons navigate you around the Museum and Orange ones highlight and explain the artifacts. To close the app, simply click the Oculus button on the controller TWICE.

Care Guidelines

The Oculus Go devices require minimum care while you are borrowing which consists of regular charging and periodic cleaning of facial surfaces.

Charging the Oculus Go

The Oculus Go has a roughly **THREE** hour battery life under constant use. For effective classroom use, it is recommended that you charge them overnight and then roughly midday during lunch or off periods. The plug and cable for each of the three devices is in the shipping case.

Cleaning the Oculus Go

There are lens clothes in the black boxes in the shipping case for cleaning the lenses as needed. Please do not use other materials to clean the lenses. There are also anti-bacterial wipes in the shipping case for daily or periodic cleaning of the facial surfaces, straps, and controllers. Do **NOT** use alcohol-based wipes or cleaners on these parts.

Returning the Oculus Go Devices

At the conclusion of your designated time to borrow the set of Oculus Go devices, you should inventory the case and then ship it back to The Bryan Museum via a shipping service that provides a tracking number such as UPS, FedEx, or USPS Priority Mail. Loans end on Fridays and we ask that you ship them on Friday afternoon or Saturday morning at the absolute latest as we need to prepare and ship the equipment to the next borrower. Be sure to use the zip ties included in the case to seal the case before shipping.

Inventory

- 3 Oculus Go Headsets
- 3 Oculus Go Controllers
