

## Samsung Gear Loading Instructions

### Guided Tour

1. Download and extract the Wonda project files from the Museum's Load Your Own Content Page.
2. Download the Wonda App to your Samsung phone

### Transfer and View your VR experience on your Phone

1. Connect the phone to a computer.
2. Copy the Wonda project files content (medias folder, *BryanMuseum\_FINAL.wonda* file and *data.json* file) from the computer to the phone's *WONDA\_VR* folder (create one if it doesn't exist).
3. Launch the Wonda VR app from the phone's stored locally folder to launch the project app.

### Self-Guided Tour

3. Download and extract the Bryan Museum App project files from the Museum's Load Your Own Content Page. Note: Suggest extracting to a folder on the desktop to create the shortest path possible.
  1. Unzip the archive onto your computer
  2. On your phone, create the folder *Android/obb/com.subvrsive.Museum*
  3. Copy the OBB to *Android/obb/com.subvrsive.Museum*
  4. Copy the APK to any folder on your phone
  5. Install the APK (We use ES File Explorer but many apps are available)
4. The Bryan Museum application will now appear as an installed app on your phone.
